Advocacy, Government, NGO, Marketing, Project management, Retail management.

The Graduate Diploma in Psychology is designed for graduates of other disciplines who have not previously completed studies in Psychology.

Upon completion, Master of Professional Psychology graduates will be eligible to undertake one year of supervised general practice, sit the national psychology exam, and subsequently apply for general registration.

The Master of Applied Psychology is also a research pathway if students undertake the Research Project subject.

Clinical Psychologists can work in forensic psychology. This is not a formal Endorsed Practice Area offered by the University.
